

STRATEGIC OUTREACH · BATCH 02 · QUEUE COMPLETE

Not outreach. Funding.

Both surfaced while verifying contact channels. Both are in the registry, and both want action in September.

ORNL INNOVATION CROSSROADS · COHORT 2027		Applications Sep 15 to Oct 30, 2026
\$115,000 PER YEAR, LIVING STIPEND	2 YEARS	8 PAGE APPLICATION
A Lab-Embedded Entrepreneurship Program node at Oak Ridge, run under DOE's Office of Technology Commercialization. Two-year funded fellowship, R&D funding for collaboration with ORNL researchers, full access to lab facilities, health insurance stipend, and professional development allowance. Applications open 8:00 AM ET September 15 and close 8:00 PM ET October 30.		
Fit	Advanced Fuel and Feedstock technology is a named topic area, as is innovation in manufacturing and scale-up for energy applications. This is a direct fit, not a stretch.	
Eligibility met	Raised no more than \$2M from non-government sources in the prior three years. US citizen. Willing to execute a CRADA.	
Eligibility to check	Doctoral degree or equivalent experience. Equivalent experience is the operative phrase and is worth asking about directly.	
The real constraint	Relocation to the Knoxville and Oak Ridge area for two years is required. That is a genuine decision for a Haslet company with a UNT subaward, and it is not a paperwork detail.	
Timing note	Applications open the same day as the Activate Fellowship. Activate's FAQ addresses whether an applicant may apply to both Activate and a LEEP program. Read that answer before committing to either.	

CROSS TIMBERS APEX · 30TH GOVERNMENT PROCUREMENT CONFERENCE	October 27, 2026
--	------------------

At the Hurst Conference Center, roughly twenty minutes from Haslet. Government agencies, prime contractors, and small businesses in one room, run by the accelerator whose service area includes Tarrant County. Registration is through Cross Timbers. Their counseling is free and funded by a Department of War cooperative agreement, and they run a veterans track.
