

STRATEGIC OUTREACH · BATCH 02 · QUEUE COMPLETE

Order of operations

Six letters now exist across both batches. This is the order that gets the most out of them.

- 1 **Cross Timbers APEX, today.** Free, local, and the October 27 conference is a fixed date. Highest return per minute on either list.
- 2 **DOE Office of Small Business Programs and Department of War, today.** Batch 01, letters 1 and 3. They wait on nothing.
- 3 **ORNL Partnerships, this week.** Ask about the Innovation Crossroads webinar before applications open on September 15.
- 4 **ARPA-E, this week.** Nothing time-critical, but it costs one send.
- 5 **EPA form and the USDA call, when convenient.** Neither is urgent. The USDA call may end the USDA thread for good, which is a useful outcome.
- 6 **DOE SBIR/STTR, after September 10.** Batch 01, letter 2. Held deliberately until the pitch is submitted.
- 7 Log every send in Outreach/OUTREACH_QUEUE.md with the date. The loop reads that file and will not write the same office twice.
- 8 One follow-up at 21 days if there is no reply. One only.

September 15 is the day that matters

Three things open or land on or near it: the Activate Fellowship Cohort 2027, ORNL Innovation Crossroads Cohort 2027, and the five days before the DOE Genesis Mission pitch closes on September 10. The funding loop will build for the first two on the first run after the fifteenth. Neither needs anything from you before then except the decision about whether relocating to Oak Ridge for two years is on the table, because that determines whether one of those applications is worth writing at all.
