

Forms and Certifications Checklist

DOE SBIR/STTR FY26 Phase I, Genesis Mission | Two stages, pitch and full application

Stage 1 is the pitch. DOE requires no forms, certifications, or representations at the pitch stage. The only gate is an AMP account. Stage 2 items apply only if the pitch is invited forward, and DOE has not yet published the full-application forms package for this opportunity. Stage 2 rows are marked by source so that nothing anticipated is mistaken for something confirmed.

Stage 1. Pitch, due September 10, 2026, 2:00 PM ET

Item	Where completed	Who signs	Status
AMP account request	https://register.ati.org/	Michael Ward. No signature required.	Required before submission. Under 5 minutes to request, allow 1 to 2 business days for approval.
Pitch submission form, four open-text answers	AMP, https://sbirsttr-amp.ati.org/	No signature. Submitted under the account holder.	Text is written. See the Pitch Responses document in this package.
Topic selection, one only	AMP submission form	No signature	Topic 1, Scaling the Biotechnology Revolution. Cannot be changed after submission.
Bibliography and References Cited	AMP file upload, PDF, 5 MB or smaller	No signature	Optional. Prepared. Upload the file named PlastiBioFuelBibliography.pdf.
Certifications and representations	Not applicable	Not applicable	None required at pitch stage. Confirmed against the ConnectWerx opportunity page and FAQ on August 22, 2026.
SBIR versus STTR election	Not applicable	Not applicable	Not made at pitch. DOE states pitches are not evaluated separately for SBIR and STTR.

Stage 2. Full application, only if invited

Rows marked Confirmed are stated on DOE or ConnectWerx pages as of August 22, 2026. Rows marked Anticipated are standard SBIR and STTR requirements that DOE has not yet published in a forms package for this opportunity. Verify every anticipated row against the invitation package before relying on it.

Item	Where completed	Who signs	Source
Active SAM.gov registration and UEI	sam.gov/entity-registration	Michael Ward as Entity Administrator	Confirmed. UEI KQAWZ54RDUM8 must be entered on the application.
SBA Company Registry registration and proof	app.www.sbir.gov/company-registration	Michael Ward	Confirmed. Proof of registration is required as part of the application.
Small Business Concern eligibility representation: for-profit, U.S. place of business, 51 percent or more U.S. citizen owned and controlled, 500 or fewer employees	Full application	Michael Ward, Founder and CEO	Confirmed as eligibility criteria. Form not yet published.
Place of performance: all research and development performed in the United States	Full application	Michael Ward	Confirmed as eligibility criteria.
SBIR only: PI primary employment certification, more than 50 percent with the small business	Full application	Michael Ward as PI	Confirmed as eligibility criteria.
SBIR only: work-share certification, small business performs at least two-thirds of Phase I effort	Full application	Michael Ward	Confirmed as eligibility criteria.
STTR only: work-share certification, small business at least 40 percent and research institution at least 30 percent	Full application	Michael Ward and UNT authorized official	Confirmed as eligibility criteria.
STTR only: written IP allocation and follow-on licensing agreement with UNT	Executed before work begins, not at submission	Michael Ward and UNT authorized official	Confirmed. DOE states this must be in place before work begins.
Essentially equivalent work and duplicate funding disclosure	Full application	Michael Ward	Anticipated. Standard across SBIR and STTR agencies. Language supplied below.
Current and pending support for all personnel	Full application	Michael Ward	Anticipated.
UNT subaward statement of work and budget	Full application attachment	Prepared by PlastiBioFuel with UNT input	Anticipated. Award-stage under 2 CFR 200.332. Institutional sign-off is not required at submission.
Budget and line-by-line justification	Full application	Michael Ward	Anticipated. Must not exceed \$250,000, or \$256,500 with TABA.

Item	Where completed	Who signs	Source
Foreign risk management and research security disclosures	Full application	Michael Ward	Anticipated. DOE maintains a Foreign Risk Management page for the SBIR and STTR programs.

Duplicate funding disclosure language, ready to use

Use this wording on any essentially equivalent work or duplicate funding certification at full application. It is already reflected in Question 4 of the pitch.

"PlastiBioFuel LLC has one other federal proposal pending: NSF SBIR Phase I, Research.gov proposal 328095, solicitation NSF 26-510, subtopic BT10 Synthetic Biology and Metabolic Engineering, total requested \$304,955, submitting against the November 4, 2026 window. That proposal addresses COF-enzyme reusability, the monomer-to-ethanol biological conversion pathway, and construction of an integrated lab-scale spiral reactor module. The scope proposed to DOE is the computational design layer: a physics-informed machine learning surrogate model of the immobilized-enzyme reactor and its experimental validation. The two efforts share no tasks, no personnel effort months, and no budget lines. This is not essentially equivalent work, and no duplicate funding would result from award of both."

Two standing rules for this package

- Dr. Shengqian Ma is listed as Other Personnel on NSF-style forms, not as Senior or Key Personnel. DOE has not published its personnel categories for this opportunity. Apply the same treatment unless the DOE form defines categories differently.
- ARG Petro is described as offtake discussions and interest. There is no signed letter of intent and no executed offtake agreement. No document in this package may say otherwise.

PlastiBioFuel LLC | UEI KQAWZ54RDUM8 | CAGE 175D6 | NAICS 325199, 325193, 541715 | SDVOSB, SBA VetCert verified
